BioVision

Caspase-9 Polyclonal Antibody

CATALOG NO:	3016-30T 3016-100	30 μg (Trial size) 100 μg
HOST:	Rabbit	
IMMUNOGEN:	Synthetic peptide surrounding amino acid 290 of human caspase-9 (ID# BV-12)	
SPECIES REACTIVITY:	Human, Mouse, Rat, Hamster, Rabbit, Pig, Bovine	

FORMULATION:

0.5 mg/ml affinity purified rabbit polyclonal antibody in phosphate buffered saline (PBS), pH 7.2, containing 30% glycerol, 0.5% BSA, 5 mM EDTA and 0.03% proclin

STORAGE CONDITIONS:

Store at -20° C. For long term storage, aliquot and freeze at -70° C. Avoid repeated freeze/defrost cycles.

BACKGROUND:

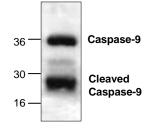

Caspase-9 is one of the most important caspases among the caspase family members. Caspase-9 is synthesized as inactive pro-enzyme that is processed in cells undergoing apoptosis. The processed caspase-9 consists of large (32-35 kD) and small (10 kD) subunits which associate to form an active enzyme. Activated caspase-9 in turn cleaves and activates caspase-3, one of the proteases responsible for the proteolytic cleavage of many key proteins in apoptosis.

APPLICATION AND USAGE:

The antibody can be used for Western blotting (0.5-4 μ g/ml). However, the optimal conditions should be determined individually. Blocking peptide is available separately (Cat.# 3016BP-50).

SPECIFICITY:

The antibody detects proform (~46 kDa), intermediate (~33-36 kDa), and the fully cleaved (~20-25 kDa) caspase-9.

Cat.# 3016-100 Western blot analysis of Caspase 9 with rat kidney tissue lysate.
