Caspase-1 Polyclonal Antibody

CATALOG NO:	3019-30T 3019-100	30 μg (Trial size) 100 μg
CONCENTRATION:	0.5 mg/ml	
HOST:	Rabbit	
IMMUNOGEN:	Synthetic peptide surrounding amino acid 132 of human caspase-1	
INTERNAL ID:	BV-27	
SPECIES REACTIVITY:	Human, Mouse, Rat	

FORMULATION:

Affinity purified rabbit anti-caspase-1 polyclonal antibody in phosphate buffered saline (PBS), pH 7.2, containing 30% glycerol, 0.5% BSA, 0.5 mM EDTA, 0.03% ProClin®

STORAGE CONDITIONS:

Store at -20°C. For long term storage, aliquot and freeze at -70°C. Avoid repeated freeze/defrost cycles.

BACKGROUND:

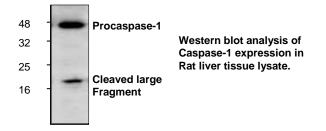

Caspase family of cysteine proteases has been shown to play a key role in apoptosis. Caspase-1 (ICE, interleukin-1 β -converting enzyme) is the mammalian caspase responsible for the proteolytic conversion of the proforms of interleukin-1 β and IL-18 into active cytokines. Like other caspases, Caspase-1 itself is synthesized as a pro-enzyme that is cleaved during activation into a large (20 kDa) and small (10 kDa) subunits. The cellular role of caspase-1 appears limited to cytokine activation as they do not have obvious roles in apoptosis.

SPECIFICITY:

The immunoaffinity purified antibody recognizes 45 kDa procaspase-1 and the 20 kDa cleaved product.

APPLICATION AND USAGE:

The antibody can be used for Western blot analysis (0.5-4 μ g/ml), immunoprecipitation (4-8 μ g/ml) and immunofluorescence (10-20 μ g/ml). However, the optimal conditions should be determined individually. Blocking peptide (Cat.# 3019BP-50) is available separately.
