

Caspase-2 Polyclonal Antibody

CATALOG NO:	3027- 30T	30 µg (Trial size)
	3027-100	100 µg
AMOUNT:	100 µg	
HOST:	Rabbit	
IMMUNOGEN:	Synthetic peptide surrounding amino acid 417 of mouse caspase-2 (ID# BV-21)	
SPECIES REACTIVITY:	Human, Mouse, Rat	

FORMULATION:

0.2 mg/ml affinity purified rabbit anti-caspase-2 polyclonal antibody in phosphate buffered saline (PBS), pH 7.2, containing 30% glycerol, 0.5% BSA, 0.01% thimerosal.

STORAGE CONDITIONS:

Store at -20° C. For long-term storage, aliquot and freeze at -70° C. Avoid repeated freeze/thaw cycles.

BACKGROUND:

Caspases play a key role in apoptosis. Similar as other caspases, caspase-2 is also synthesized as an inactive pro-enzyme that is processed in cells undergoing apoptosis. Caspase-2 mRNA is alternatively spliced. The larger mRNA species encoding a product of 435 amino acids is known as ICH-1_L. The smaller mRNA species encoding a protein of 312 amino acids is named ICH-1_S. Over expression of ICH-1_L induces apoptosis, while over expression of ICH-1_S suppresses Rat-1 cell death induced by serum deprivation.

SPECIFICITY:

Detects the full length and small subunit of caspase-2. In human samples, it also detects a 30 kDa intermediate fragment. Mouse small intestine lysate can be used as a positive control. Blocking peptide for the antibody is also available (Cat.# 3027-50BP).

APPLICATION AND USAGE:

The antibody can be used for Western blotting (1-2 µg/ml), and Immunohistochemistry (5 µg/ml). However, the optimal conditions should be determined individually.
