

p53 Polyclonal Antibody

CATALOG NO:	3036R-30T	30 µg (Trial size)
	3036R-100	100 µg
HOST:	Rabbit	
IMMUNOGEN:	Synthetic peptide corresponding to residue surrounding amino acid 375 of human p53 (ID# BV-959).	
SPECIES REACTIVITY:	Human, Mouse, Rat, Dog, Rabbit	

FORMULATION:

0.5 mg/ml affinity purified rabbit anti-p53 polyclonal antibody in phosphate buffered saline (PBS), pH 7.2, containing 30% glycerol, 0.5% BSA, 5 mM EDTA and 0.03% proclin.

STORAGE CONDITIONS:

Store at -20°C. For long-term storage, aliquot and freeze at -70°C. Avoid repeated freeze/defrost cycles.

BACKGROUND DESCRIPTION:

p53, a 53 kDa protein, binds to a DNA consensus sequence, the p53 response element, and regulates normal cell cycle events by activating transcription of genes involved either in progression through the cell cycle, or causing arrest in G1 when the genome is damaged. In most transformed and tumor cells the concentration of p53 is increased 5-1000 fold over the concentration in normal cells, principally due to the increased half-life (4 hrs) compared to that of wild-type (20 min). p53 localizes in the nucleus, but is detectable at the plasma membrane during mitosis and certain mutations also modulate cytoplasmic/nuclear distribution. p53 downregulates Bcl-2 expression and upregulates Bax expression, but may not always be necessary for apoptosis.

APPLICATION AND USAGE:

The antibody can be used for Western blot analysis (0.5-4 µg/ml). It detects p53 in samples of human, mouse and rat origins. Other applications have not been determined. Blocking peptide (Cat.# 3036RBP-50) is available separately.

Cat. #: 3036R-100

Western blot analysis of p53 in 3T3 (Lane 1) and Jurkat (Lane 2, 3) cell lysates.

FOR RESEARCH USE ONLY! Not to be used on humans.
