

RAIDD Polyclonal Antibody

CATALOG NO: 3037-30T 30 µg (Trial size)
3037-100 100 µg

HOST: Rabbit

IMMUNOGEN: Synthetic peptide surrounding amino acid 171 of human RAIDD (ID# BV-D68G).

SPECIES REACTIVITY: Human, Mouse, Rat

FORMULATION:

0.2 mg/ml affinity purified rabbit anti-RAIDD polyclonal antibody in phosphate buffered saline (PBS), pH 7.2, containing 30% glycerol, 0.5% BSA, 0.01% thimerosal.

STORAGE CONDITIONS:

Store at -20°C. For long term storage, aliquot and freeze at -70°C. Avoid repeated freeze/thaw cycles.

DESCRIPTION:

RAIDD, also known as CRADD, is a 22 kDa protein that mediates apoptosis caused by Fas (CD95) and TNFR1. RAIDD binds to RIP through their death domains and binds to the death effector domain of caspase-2 to transduce death signals. RAIDD is constitutively expressed in many tissues.

SPECIFICITY:

The antibody detects a 22 kDa band, corresponding to the expected molecular mass of RAIDD on immunoblots.

APPLICATION AND USAGE:

The antibody can be used for Western blot analysis (0.5-4 µg/ml). However, the optimal conditions should be determined individually. Blocking peptide (Cat.# 3037BP-50) is available separately.

FOR RESEARCH USE ONLY! Not to be used on humans.
