

AMPK α 1, Rabbit pAb

CATALOG #:	3110-100
AMOUNT:	100 μ g
LOT #:	_____
HOST (ISOTYPE):	Rabbit (Ig)
IMMUNOGEN:	KLH conjugated synthetic peptide selected from the C-terminal region of human AMPK alpha 1.
SPECIES REACTIVITY:	Human, Mouse

FORMULATION:

100 μ g (0.25 mg/ml) purified rabbit Ig polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein G column, eluted with high and low pH buffers and neutralized immediately, followed by dialysis against PBS.

STORAGE CONDITIONS:

Maintain refrigerated at 2-8°C for up to 6 months or -20°C for long term storage.

BACKGROUND DESCRIPTION:

AMPK is responsible for the regulation of fatty acid synthesis by phosphorylation of acetyl-CoA carboxylase. It also regulates cholesterol synthesis via phosphorylation and inactivation of hormone-sensitive lipase and hydroxymethylglutaryl-CoA reductase. It appears to act as a metabolic stress-sensing protein kinase switching off biosynthetic pathways when cellular ATP levels are depleted and when 5'-AMP rises in response to fuel limitation and/or hypoxia. AMPK alpha1, a member of the Ser/Thr protein kinase family, is a catalytic subunit of AMPK.

Background References:

- Stapleton, D., et al., J. Biol. Chem. 271(2):611-614 (1996).

OTHER NAMES:

5'-AMP-activated protein kinase, catalytic alpha-1 chain; AMPK alpha-1 chain

SPECIFICITY:

The antibody detects a ~63 kDa band, corresponding to the expected molecular mass of AMPK on immunoblots.

APPLICATION (suggested concentration):

The antibody can be used for ELISA (0.25 μ g/ml), Western blotting (0.5 – 2.5 μ g/ml).

FOR RESEARCH USE ONLY. Not to be used on humans

APPLICATION DATA (Calculated MW = 62793 Da):

Western blot analysis of anti-AMPK alpha 1 C-term pAb in mouse liver lysate. AMPK alpha 1 (arrow) was detected using purified pAb. Secondary HRP-anti-rabbit was used for signal visualization with chemiluminescence.
