

PKA Polyclonal Antibody

CATALOG NO: 3115-30T 30 µg (Trial size)
3115-100 100 µg

HOST: Rabbit

IMMUNOGEN: Synthetic peptide surrounding amino acid 11 of the catalytic subunit of human PKA alpha isoform (ID# BV-234).

SPECIES REACTIVITY: Human, Mouse, Rat, Bovine, Sheep, Pig

FORMULATION:

0.5 mg/ml affinity purified rabbit anti-PKA polyclonal antibody in phosphate buffered saline (PBS), pH 7.2, containing 30% glycerol, 0.5% BSA, 0.01% thimerosal.

STORAGE CONDITIONS:

Store at -20°C. For long-term storage, aliquot and freeze at -70°C. Avoid repeated freeze/thaw cycles.

BACKGROUND DESCRIPTION:

Protein kinase A (PKA) also known as cAMP-dependent protein kinase, is a 40 kDa protein kinase that phosphorylates serine or threonine residues in target proteins in response to elevated levels of cAMP. It has been suggested that the complex structure of PKA may be necessary for it to accomplish such diverse functions.

SPECIFICITY:

Recognizes the 40 kDa PKA of human, mouse, rat, bovine, sheep, and pig origins on SDS-PAGE immunoblots. Blocking peptide (Cat.# 3115BP-50) is available separately.

APPLICATION AND USAGE:

The antibody can be used in Western blot analysis (0.5-4 µg/ml). Jurkat cell lysate (Cat.# 2401-100) can be used as a positive control. Based on researcher's feedback, it can also be used in immunoprecipitation (20-30 µg/ml). However, the optimal conditions should be determined individually.

Cat.# 3115-100

Western blot analysis of PKA expression in lysates from Jurkat cells (Lane 1 & 2), mouse small intestine (Lane 3) and rat kidney (Lane 4).

FOR RESEARCH USE ONLY! Not to be used on humans.
