

Survivin Polyclonal Antibody

CATALOG NO:	3160-30T	30 µg (Trial size)
	3160-100	100 µg
HOST:	Rabbit	
IMMUNOGEN:	Synthetic peptide surrounding amino acids 147 of human surviving (ID# BV-D71G)	
SPECIES REACTIVITY:	Human, Mouse, Rat	

FORMULATION:

0.5 mg/ml affinity purified rabbit anti-Survivin polyclonal antibody in phosphate buffered saline (PBS), pH 7.2, containing 30% glycerol, 0.5% BSA, 5 mM EDTA, 0.01% thimerosal.

STORAGE CONDITIONS:

Store at -20°C. For long term storage, aliquot and freeze at -70°C. Avoid repeated freeze/thaw cycles.

BACKGROUND DESCRIPTION:

Survivin is a newly described apoptosis inhibitor that is expressed in many human cancers, but undetectable in terminally differentiated adult tissues. It has been shown that recombinant expression of Survivin counteracts apoptosis of B lymphocyte precursors deprived of interleukin 3 (IL-3), suggesting a potential role of Survivin in cancer therapy. Survivin is expressed in G2-M phase in a cell cycle-dependent manner and directly associated with mitotic spindle microtubules, suggesting a role in both apoptosis regulation and cell cycle progression.

APPLICATION AND USAGE:

The antibody can be used for Western blot analysis (0.5-4 µg/ml). However, the optimal conditions should be determined individually. Blocking peptide (Cat.# 3160BP-50) is available separately.

Cat. No: 3160-100
Western blot analysis of
Survivin expression using
Jurkat cell lysate.

FOR RESEARCH USE ONLY! Not to be used on humans.
