

BAFF Polyclonal Antibody

CATALOG NO:	3203-30T	30 µg (Trial size)
	3203-100	100 µg
HOST:	Rabbit	
IMMUNOGEN:	Recombinant human BAFF (ID# BV-318)	
SPECIES REACTIVITY:	Human	

FORMULATION:

0.5 mg/ml affinity purified rabbit anti-BAFF polyclonal antibody in phosphate buffered saline (PBS), pH 7.2, containing 30% glycerol, 0.5% BSA, 0.01% thimerosal.

STORAGE CONDITIONS:

Store at -20°C. For long term storage, aliquot and freeze at -70°C. Avoid repeated freeze/thaw cycles.

BACKGROUND:

BAFF (for B cell Activating Factor) is a novel member in the TNF family. BAFF/BLyS was characterized as a B cell stimulator since it induced B cell proliferation and immunoglobulin secretion. Two receptors for BAFF were recently identified and designated TACI and BCMA. BAFF and its receptors are involved in the development of systemic lupus erythaematosus and other B cell associated autoimmune diseases. Like TNF- α and TRAIL, THANK was shown to activate NF- κ B and c-Jun N-terminal kinase (JNK) and to induce apoptosis.

APPLICATION AND USAGE:

The antibody can be used for Western blotting (0.5-4 µg/ml). However, the optimal conditions should be determined individually. A 32 kDa full length BAFF and the 18 kDa cleavage fragment can be detected.

SPECIFICITY:

The immunoaffinity purified antibody detects human BAFF. Jurkat cell lysate can be used as a positive control. Based on researchers' feedback, it also reacts with mouse and rat samples.

FOR RESEARCH USE ONLY! Not to be used on humans.
