

## Bid Polyclonal Antibody

<b>CATALOG NO:</b>	3272-30T	30 µg (Trial size)
	3272-100	100 µg
<b>HOST:</b>	Rabbit	
<b>IMMUNOGEN:</b>	Synthetic peptide surrounding amino acid 45 of mouse Bid (ID# BV-550).	
<b>SPECIES REACTIVITY:</b>	Mouse	

### FORMULATION:

0.5 mg/ml affinity purified rabbit anti-Bid polyclonal antibody in phosphate buffered saline (PBS), pH 7.2, containing 30% glycerol, 0.5% BSA, 0.01% thimerosal.

### STORAGE CONDITIONS:

Store at -20°C. For long term storage, aliquot and freeze at -70°C. Avoid repeated freeze/defrost cycles.

### BACKGROUND DESCRIPTION:

Bid, a BH3 domain-containing proapoptotic Bcl-2 family member, is localized in the cytosolic fraction of cells as an inactive precursor. Its active form is generated upon proteolytic cleavage by caspase-8 in the Fas signaling pathway. Cleaved Bid translocates to mitochondria and releases its potent proapoptotic activity, which in turn induces cytochrome c release and mitochondrial damage. The cytochrome c releasing activity of Bid was antagonized by Bcl-2. Mutation in the SH3 domain can diminish the cytochrome c releasing activity. In the animal model studies, Bid-deficient mice are found resistant to the lethal effects of death factor signals relayed through Fas.

### SPECIFICITY:

The antibody detects the full length (22 kDa) mouse Bid. Reactivity to other species has not been tested.

### APPLICATION AND USAGE:

The antibody can be used in Western blot analysis (0.5-5 µg/ml). Per researcher's feedback, it also works well in immunoprecipitation (20 µg/ml) and immunohistochemistry (20 µg/ml). However, the optimal conditions should be determined individually. Blocking peptide (Cat.# 3272BP-50) is available separately.

**FOR RESEARCH USE ONLY! Not to be used on humans.**

**Cat. #: 3272-100**  
Western blot analysis of BID expression in 3T3 cell lysate.
