

ILP-2 Polyclonal Antibody

CATALOG NO: 3337-30T 30 µg (Trial size)
3337-100 100 µg

SPECIES REACTIVITY: Human, Mouse, Rat

IMMUNOGEN: Synthetic peptide surrounding amino acid 23 of human ILP-2 (ID# BV-D39G).

FORMULATION:

0.5 mg/ml affinity purified rabbit anti-ILP-2 polyclonal antibody in phosphate buffered saline (PBS), pH 7.2, containing 30% glycerol, 0.5% BSA, 0.01% thimerosal.

STORAGE CONDITIONS:

Store at -20°C. For long-term storage, aliquot and freeze at -70°C. Avoid repeated freeze/thaw cycles.

BACKGROUND:

ILP-2 (for IAP-like protein-2) is a novel member of the IAP (Inhibitor of Apoptosis) protein family. ILP-2 has high homology to ILP-1, but is encoded by a distinct gene that is solely expressed in testis of tested normal human tissues. ILP-2, unlike ILP-1, has no inhibitory effect on Fas and TNF induced apoptosis, but potently inhibits apoptosis induced by overexpression of Bax or by coexpression of caspase-9 with Apaf-1. ILP-2 interacts with the processed caspase-9.

SPECIFICITY:

The affinity-purified rabbit antibody recognizes ~32 kDa ILP-2 in samples from human, mouse and rat origins.

APPLICATION AND USAGE:

The antibody can be used for Western blotting (0.5-4 µg/ml). However, the optimal dilution conditions should be determined individually. Blocking peptide (Cat.# 3337BP-50) is also available.

FOR RESEARCH USE ONLY! Not to be used on humans.
