

TFPI Polyclonal Antibody

CATALOG NO:	3379-30T	30 µg (Trial size)
	3379-100	100 µg
HOST:	Rabbit	
IMMUNOGEN:	Synthetic peptide corresponding to residues surrounding amino acid 287 of human TFPI.	
INTERNAL ID#:	BV-K50	
SPECIES REACTIVITY:	Human, Rat	
FORMULATION:	0.5 mg/ml in phosphate buffered saline (PBS), pH 7.2, containing 30% glycerol, 0.5% BSA, 5 mM EDTA and 0.03% Proclin	

STORAGE CONDITIONS:

Store at -20°C. For long-term storage, aliquot and freeze at -70°C. Avoid repeated freeze/thaw cycles.

BACKGROUND:

TFPI is also known as lipoprotein-associated coagulation inhibitor (LACI). TFPI encodes a protease inhibitor that regulates the tissue factor (TF)-dependent pathway of blood coagulation. The coagulation process initiates the formation of factor VIIa-TF complex, which proteolytically activates additional proteases and this leads to the formation of a fibrin clot. The encoded protein is glycosylated and primarily found in the vascular endothelium and plasma.

APPLICATION AND USAGE:

The antibody can be used in Western blotting (0.5-4 µg/ml). However, the optimal conditions should be determined individually. Blocking peptide (Cat.# 3379BP-50) is available separately.

Cat.#: 3379-100 Antibody.
Western blot analysis of TFPI with Jurkat cell lysate (Lane 1 & 2).

FOR RESEARCH USE ONLY! Not to be used on humans.
