

Phospho-CaMKII Polyclonal Antibody

CATALOG #: 3384-100

AMOUNT: 100 µl

FORMULATION:

100 µl purified rabbit polyclonal anti-Phospho-CaMKII (Thr286) antibody in phosphate-buffered saline (PBS) containing 50% glycerol, 1% BSA, and 0.02% thimerosal.

SPECIES REACTIVITY: Human, Mouse, Rat

STORAGE CONDITIONS:

Store at -20°C. For long term storage, aliquot and freeze at -70°C. Avoid repeated freeze/thaw cycles.

DESCRIPTION:

CaMKII is a member of calcium/calmodulin-activated kinase, functioning in neural synaptic stimulation and T-cell receptor signaling. CaMKII has catalytic and regulatory domains. The binding of Ca⁺⁺/calmodulin to its regulatory domain releases its autoinhibitory effect and activates the kinase. The activated CaMKII further autophosphorylates itself at Thr286 to render the kinase constitutively active.

SPECIFICITY:

The anti-Phospho-CaMKII antibody recognizes only the phosphorylated CaMKII (Thr286) in samples from human, mouse, and rat origins.

APPLICATION:

The antibody can be used for Western blotting at 4-8 µl/ml. However, the optimal concentrations should be determined individually.

FOR RESEARCH USE ONLY! Not to be used on humans.
