

TLR3 Polyclonal Antibody

CATALOG #:	3445-100
AMOUNT:	100 µl
LOT #:	_____
HOST:	Rabbit
IMMUNOGEN:	Recombinant human TLR3

FORMULATION:

100 µl antigen affinity purified rabbit anti-human TLR3 polyclonal antibody in phosphate buffered saline (PBS), pH 7.2, containing 50% glycerol and 0.02% thimerosal.

SPECIES REACTIVITY: Human

STORAGE CONDITIONS:

Store at -20°C. For long-term storage, aliquot and freeze at -70°C. Avoid repeated freeze/thaw cycles.

BACKGROUND:

To date, at least ten members of the Toll family have been identified. TLRs recognize molecular patterns associated with microbial pathogens and induce antimicrobial immune response. TLR3 recognizes double-stranded (ds)RNA, induces the activation of NF-κB, through MyD88-dependent and -independent pathways, and the production of type I interferons (IFNs). Similar to several other members of the TLR family, TLR3 has been reported to be expressed at a very low level on the surface of human fibroblast cell lines.

APPLICATION AND USAGE:

The antibody can be used for Western blotting (1:500-1000). However, the optimal conditions should be determined individually.

SPECIFICITY:

The antibody has been selected for its ability to recognize human TLR3 in ELISA and Western blotting.

FOR RESEARCH USE ONLY! Not to be used on humans.
