

TLR1 Polyclonal Antibody

CATALOG #:	3446-100
AMOUNT:	100 µl
LOT #:	_____
HOST:	Goat
IMMUNOGEN:	Recombinant human TLR1

FORMULATION:

100 µl antigen affinity purified goat polyclonal antibody in phosphate-buffered saline (PBS) containing 50% glycerol, 1% BSA, and 0.02% thimerosal.

SPECIES REACTIVITY: Human

STORAGE CONDITIONS:

Store at -20°C. For long term storage, aliquot and freeze at -70°C. Avoid repeated freeze/defrost cycles.

BACKGROUND:

The TLR (toll-like receptors) family of proteins are characterized by a highly conserved Toll homology (TH) domain, which is essential for Toll-induced signal transduction. TLR1, as well as the other TLR family members, are type I transmembrane receptors that characteristically contain an extracellular domain consisting of several leucine-rich regions along with a single cytoplasmic Toll/IL-1R-like domain. TLR2 and TLR4 are activated in response to lipopolysacchride (LPS) stimulation, which results in the activation and translocation of NFκB and suggests that these receptors are involved in mediating inflammatory responses. Expression of TLR receptors is highest in peripheral blood leukocytes, macrophages, and monocytes. TLR6 is highly homologous to TLR1, sharing greater than 65% sequence identity, and, like other members of TLR family, it induces NFκB signaling upon activation.

SPECIFICITY:

The antibody recognizes human TLR1. Reactivity to other species has not been tested.

APPLICATION:

The antibody can be used in Western blotting (1:200-1000) and ELISA (1:100-500). However, the optimal concentrations should be determined individually.
