

## Anti-Phospho-PKC Polyclonal Antibody

**CATALOG #:** 3451-100

**AMOUNT:** 100 µg

**LOT #:** \_\_\_\_\_

**HOST:** Rabbit

### FORMULATION:

100 µg (0.5 mg/ml) purified rabbit polyclonal antibody in phosphate-buffered saline (PBS) containing 50% glycerol, 1% BSA, and 0.02% sodium azide.

**SPECIES REACTIVITY:** Human, Mouse, Rat

### STORAGE CONDITIONS:

Store at -20°C. For long term storage, aliquot and freeze at -70°C. Avoid repeated freeze/thaw cycles.

### BACKGROUND:

PKC (Protein kinase C) is a calcium-dependent and phospholipid-dependent enzyme that is activated *in vivo* by the lipid diacylglycerol. PKC has been shown to be involved in signal transduction and various aspects of neoplastic transformation. PKC contains an amino terminal regulatory domain and a carboxy terminal catalytic domain joined by a hinge region. Cleavage of protein kinase C *in vitro* results in the generation of two functional fragments corresponding to these two domains.

### SPECIFICITY:

The antibody recognizes several Phosphorylated PKC (Ser660) isoforms of human, mouse, and rat origins. Reactivity to other species has not been tested.

### APPLICATION:

The antibody can be used in Western blotting (1-2 µg/ml). However, the optimal concentrations should be determined individually.

**FOR RESEARCH USE ONLY! Not to be used on humans.**
