

Phospho-Lck Polyclonal Antibody

CATALOG #:	3499-100
AMOUNT:	100 µg
LOT #:	_____
HOST:	Rabbit
IMMUNOGEN:	Synthetic peptide corresponding to amino acids around Tyr505 of human Lck
FORMULATION:	100 µg (0.5 mg/ml) antigen affinity purified rabbit polyclonal antibody in phosphate buffered saline (PBS), pH 7.2, containing 50% glycerol, 1% BSA, 0.02% sodium azide.
SPECIES REACTIVITY:	Human, Mouse, Rat

STORAGE CONDITIONS:

Store at -20°C. For long-term storage, aliquot and freeze at -70°C. Avoid repeated freeze/thaw cycles.

BACKGROUND:

Lck is a membrane associated tyrosine protein kinases. The Lck gene has been shown to undergo rearrangement and overexpression in some murine lymphomas. In human studies, it has been demonstrated that the Lck gene is localized to a site in the genome which undergoes frequent chromosomal abnormalities in lymphomas and neuroblastomas. Resting T cells contain high levels of the Lck protein and mRNA both of which decline upon activation of the T cells. These and other observations suggest that alterations in Lck expression may contribute to the pathogenesis of some types of neoplastic disease.

APPLICATION AND USAGE:

The antibody can be used for Western blotting (1-2 µg/ml), immunoprecipitation (10-20 µg/ml), and immunohistochemistry (20-25 µg/ml). However, the optimal conditions should be determined individually.

SPECIFICITY:

The antibody detects 56 kDa phosphorylated Lck (Tyr505) of human, mouse and rat origins. Reactivity to other species has not been tested.

FOR RESEARCH USE ONLY. Not to be used on humans.
