

TRAF6 Polyclonal Antibody

CATALOG NO:	3566R-30T	30 µg (Trial size)
	3566R-100	100 µg
HOST:	Rabbit	
IMMUNOGEN:	Synthetic peptide surrounding amino acid 436 of rat TRAF6 (ID# BV-F63G)	
SPECIES REACTIVITY:	Human, Mouse, Rat, Cattle, Hamster, Monkey, Pig	

FORMULATION:

0.5 mg/ml affinity purified rabbit polyclonal antibody in phosphate-buffered saline (PBS) containing 30% glycerol, 0.5% BSA, and 0.01% thimerosal.

STORAGE CONDITIONS:

Store at -20°C. For long term storage, aliquot and freeze at -70°C. Avoid repeated freeze/thaw cycles.

BACKGROUND:

TRAFs (TNF receptor associated proteins) form a family of cytoplasmic adapter proteins that mediate signal transduction from many members of the TNF-receptor superfamily and the interleukin-1 receptor. The carboxy-terminal region of TRAFs is required for self-association and interaction with receptor cytoplasmic domains following ligand-induced oligomerization. Recent molecular cloning studies have led to identification of six TRAFs (TRAF1-TRAF6). Recently it has been shown that TRANCE/OPGL activates the antiapoptotic serine/threonine kinase Akt/PKB through a signaling complex involving c-Src and TRAF6. Mice deficient in TRAF6 are osteopetrotic with defects in bone remodeling and tooth eruption due to impaired osteoclast function. Like TRAF2 and TRAF3, TRAF6 is also essential for perinatal and postnatal survival. These findings establish diverse and critical roles for TRAF6 in prenatal and postnatal survival, bone metabolism, LPS, and cytokine signaling.

SPECIFICITY:

The antibody recognizes 54 kDa TRAF6 in samples of human and mouse origins. Reactivity to other species has not been tested.

APPLICATION:

The antibody can be used in Western blotting (0.5-4 µg/ml). However, the optimal concentrations should be determined individually. Blocking peptide (Cat.# 3566RBP-50) is available separately.

**Cat. #: 3566-100**

Western blot analysis of TRAF6 in 3T3 cell lysate (Lane 1) and in Jurkat cell lysate (Lane 2 & 3).
