

VDAC/Porin Polyclonal Antibody

CATALOG #: 3594-30T 30 µg (Trial size)
3594-100 100 µg

HOST: Rabbit

IMMUNOGEN: Synthetic peptide surrounding amino acid 189 of human VDAC (ID# BV-596).

SPECIES REACTIVITY: Human, Mouse, Rat, Bovine, Rabbit, Pig

FORMULATION:

0.5 mg/ml affinity purified rabbit anti-VDAC/Porin polyclonal antibody in phosphate-buffered saline (PBS) containing 30% glycerol, 0.5% BSA, and 0.01% thimerosal.

STORAGE CONDITIONS:

Store at -20°C. For long term storage, aliquot and freeze at -70°C. Avoid repeated freeze/thaw cycles.

DESCRIPTION:

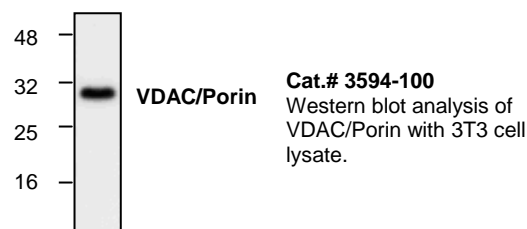

The Voltage-Dependent Anion Channel (VDAC or mitochondrial Porin) is an outer membrane mitochondrial protein. The VDAC protein is thought to form the major pores through which adenine nucleotides are transferred through the outer mitochondrial membrane. VDAC has also been implicated in the formation of the mitochondrial permeability transition pore complex in apoptotic cells. This complex, formed by VDAC, ANT, and CypD is thought to allow the mitochondria to undergo metabolic uncoupling and irreversible morphologic changes that ultimately destroy the mitochondria during apoptosis.

SPECIFICITY:

The antibody recognizes ~31 kDa VDAC/Porin from samples of human, mouse, rat, bovine, pig, and rabbit origins.

APPLICATION:

The antibody can be used for Western blotting (0.5-4 µg/ml), and Immunohistochemistry (2.5 µg/ml). However, the optimal concentrations should be determined individually. Blocking peptide (Cat.# 3594BP-50) is available separately.

RELATED PRODUCTS:

Apoptosis Detection Kits & Reagents

- Annexin V Kits & Bulk Reagents
- Caspase Assay Kits & Reagents
- Mitochondrial Apoptosis Kits & Reagents
- Nuclear Apoptosis Kits & Reagents
- Apoptosis Inducers and Set
- Apoptosis siRNA Vectors

Cell Fractionation System

- Mitochondria/Cytosol Fractionation Kit
- Nuclear/Cytosol Fractionation Kit
- Membrane Protein Extraction Kit
- Cytosol/Particulate Rapid Separation Kit
- Mammalian Cell Extraction Kit
