Histone H2A Polyclonal Antibody

CATALOG NO: 3621-30T 30 µg (Trial size)

3621-100 100 μg

HOST: Rabbit

IMMUNOGEN: Synthetic peptide corresponding to the N-terminus of

human histone H2A (Internal ID# BV-597)

SPECIES REACTIVITY: Human, Mouse, Rat, Chicken

FORMULATION:

0.5 mg/ml affinity purified rabbit anti-Histone H2A polyclonal antibody in phosphate buffered saline (PBS), pH 7.2 containing 30% glycerol, 0.5% BSA, 5 mM EDTA and 0.03% proclin.

STORAGE CONDITIONS:

Store at -20°C. For long-term storage, aliquot and freeze at -70°C. Avoid repeated freeze/defrost cycles.

BACKGROUND:

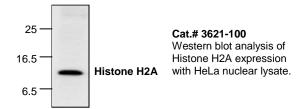

The nucleosome is made up of four core histone proteins (H2A, H2B, H3 and H4) and is the primary building block of chromatin. The N-terminal tail of core histones undergoes different posttranscriptional modification including acetylation, phosphorylation and methylation. These modifications occur in response to cell signal stimuli and have a direct effect on gene expression.

APPLICATION AND USAGE:

The antibody can be used in Western blotting (0.5-4 μ g/ml). Per researchers feedback, it can also be used in immunoprecipitation (10-20 μ g/ml) and Immunohistochemistry (10-30 μ g/ml). However, the optimal conditions should be determined individually.

SPECIFICITY:

The antibody detects ~14 kDa histone H2A protein. It does not cross-react with other histones. HeLa cell nuclear extract (Cat.# 1641-1) can be used as a positive control. Blocking peptide (Cat.# 3621BP-50) is also available separately.
