

P-Selectin Polyclonal Antibody

CATALOG NO:	3633R-30T	30 µg (Trial size)
	3633R-100	100 µg
HOST:	Rabbit	
IMMUNOGEN:	Synthetic peptide surrounding amino acid 756 of mouse P-Selectin (ID# BV-348)	
SPECIES REACTIVITY:	Human, Mouse, Rat	

FORMULATION:

0.5mg/ml affinity purified rabbit anti-P-Selectin polyclonal antibody in phosphate-buffered saline (PBS) containing 30% glycerol, 0.5% BSA, and 0.01% thimerosal.

STORAGE CONDITIONS:

Store at -20°C. For long term storage, aliquot and freeze at -70°C. Avoid repeated freeze/thaw cycles.

DESCRIPTION:

Selectins are a family of carbohydrate-binding proteins involved in mediating cellular interactions with leukocytes. E-Selectin (also called ELMA-1) expressed on endothelial cells. L-Selectin (also called LECAM-1) is expressed on the majority of B and naïve T cells and on most monocytes, neutrophils and eosinophils. P-Selectin (also called GMP-140) expressed on activated platelets and endothelial cells. Selectins interact with specific carbohydrates expressed by activated endothelial cells, monocytes, and neutrophils.

SPECIFICITY:

The antibody recognizes 84 kDa P-Selectin in samples from human, mouse, and rat origins.

APPLICATION:

The antibody can be used for Western blotting (0.5-4 µg/ml) and Immunohistochemistry (2.5 µg/ml). However, the optimal concentrations should be determined individually. Jurkat cell lysate (Cat.# 2401-100) can be used as a positive control. Blocking peptide (Cat.# 3633RBP-50) is also available.
