

Annexin VIII Polyclonal Antibody

CATALOG NO: 3637-30T 30 µg (Trial size)
3637-100 100 µg

FORMULATION:

0.5 mg/ml purified goat anti-Annexin VIII polyclonal antibody in phosphate buffered saline (PBS), pH 7.2, containing 50% glycerol, 1% BSA, 0.02% sodium azide.

SPECIES REACTIVITY: Human (reacts with mouse and rat at less extent)

STORAGE CONDITIONS:

Store at -20°C. For long-term storage, aliquot and freeze at -70°C. Avoid repeated freeze/thaw cycles.

BACKGROUND:

The annexin family of calcium-binding proteins is composed of at least ten mammalian genes. It is characterized by a conserved core domain which binds to phospholipids in a Ca²⁺-dependent manner. Its unique amino terminal region may confer the binding specificity. Annexin family members have been implicated as regulators of diverse processes as ion flux, endocytosis and exocytosis, and cellular adhesion. Annexin VIII is preferentially expressed in acute promyelocytic leukemia (APL) cells which may relate its role in hematopoietic cell differentiation.

SPECIFICITY:

The antibody detects 36 kDa human annexin VIII. Cross-reactivity to other species has not been determined.

APPLICATION AND USAGE:

The antibody can be used for Western blotting (1-4 µg/ml). However, the optimal conditions should be determined individually. Other applications have not been determined.

FOR RESEARCH USE ONLY! Not to be used on humans.
