

MAP-1 Polyclonal Antibody

CATALOG NO: 3694-30T 30 µg (Trial size)
3694-100 100 µg

HOST: Rabbit

IMMUNOGEN: Synthetic peptide surrounding a.a. 342 of mouse MAP-1 (ID# BV-134).

SPECIES REACTIVITY: Human, Mouse, Rat

FORMULATION:

0.5 mg/ml Protein A affinity purified rabbit polyclonal antibody in phosphate-buffered saline (PBS) containing 30% glycerol, 0.5% BSA, and 0.01% thimerosal.

STORAGE CONDITIONS:

Store at -20°C. For long term storage, aliquot and freeze at -70°C. Avoid repeated freeze/thaw cycles.

DESCRIPTION:

Human MAP-1 (Modulator of Apoptosis Protein) is a novel Bax-associating protein. MAP-1 mediates caspase-dependent apoptosis in mammalian cells when overexpressed. MAP-1 homodimerizes and associates with the proapoptotic Bax and the prosurvival Bcl-2 and Bcl-X_L of the Bcl-2 family.

SPECIFICITY:

The antibody recognizes 39 kDa MAP-1 from samples of human, mouse and rat origins. Reactivity to other species has not been determined. In human samples, an additional ~78 kDa dimer can be detected in Jurkat cell lysate. In mouse sample, an additional ~33 kDa cleavage fragment can also be detected in mouse small intestine tissue lysate.

APPLICATION:

The antibody can be used for Western blotting (1-4 µg/ml). However, the optimal concentrations should be determined individually. Jurkat cell lysate (Cat.# 2401-100) and mouse small intestine tissue lysate (Cat.# 2601-100) can be used as positive controls. Blocking peptide is also available (Cat.# 3694BP-50).

Cat.# 3694-100

Western blot analysis of MAP-1 expression in mouse small intestine tissue lysate.
