

BMP-13 Polyclonal Antibody

CATALOG NO:	3823-30T	30 µg (Trial size)
	3823-100	100 µg
HOST:	Rabbit	
IMMUNOGEN:	<i>E. coli</i> expressed recombinant human BMP-13 (Internal ID# BV-902)	
SPECIES REACTIVITY:	Human	

FORMULATION:

0.5 mg/ml affinity purified rabbit anti-BMP-13 polyclonal antibody in phosphate buffered saline (PBS), pH 7.2, containing 30% glycerol, 0.5% BSA, and 0.01% thimerosal.

STORAGE CONDITIONS:

Store at -20°C. For long-term storage, aliquot and refreeze at -70°C. Avoid repeated freeze/defrost cycles.

BACKGROUND:

BMPs (bone morphogenetic proteins) belong to the TGF-β superfamily of structurally related signaling proteins. These ligands mediate numerous physiological processes. BMPs initiate, promote and maintain cartilage and bone development, growth, remodeling and repair, in both prenatal development and postnatal growth of eye, heart, kidney, skin, and other tissues. Expression of BMP-13 has been found in the hypertrophic chondrocytes of ossifying long bone centers.

APPLICATION AND USAGE:

The antibody can be used for Western blot analysis (0.5-4 µg/ml). However, the optimal conditions should be determined individually. Recombinant human BMP-13 (Cat.#: 4639-10) can be used as a positive control. Both monomer and dimer of BMP-13 can be detected.

Cat. # 3823-100
Western blot analysis using recombinant human BMP-13 (Cat.# 4639-10). Both monomer and dimer can be detected.

FOR RESEARCH USE ONLY! Not to be used on humans.
