

Galectin-9 Polyclonal Antibody

CATALOG NO: 3827-30T 30 µg (Trial size)
3827-100 100 µg

HOST: Rabbit

IMMUNOGEN: Synthetic peptide corresponding to residues surrounding amino acids 344 of human Galectin-9 (Internal ID# BV-863).

SPECIES REACTIVITY: Human

FORMULATION:

0.5 mg/ml affinity purified rabbit anti-Galectin-9 polyclonal antibody in phosphate (PBS, pH 7.2) containing 30% glycerol, 0.5% BSA and 0.01% thimerosal.

STORAGE CONDITIONS:

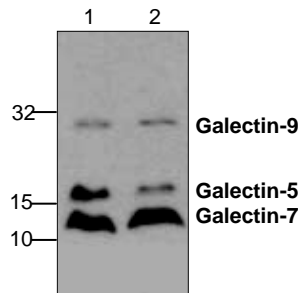

Store at -20°C. For long-term storage, aliquot and freeze at -70°C. Avoid repeated freezing/defrost cycles.

BACKGROUND DESCRIPTION:

Galectin-9 is an eosinophile chemoattractant produced by activated T lymphocytes. It is an integral membrane protein that plays a role in immuno/inflammation processes that causes inflammatory reactions in the central nervous system (CNS). Galectin-9 exists as two isoforms, a long form and a short form, which differ by an internal stretch of 32 amino acids.

APPLICATION:

The antibody can be used in Western Blot analysis (0.5-4.0 µg/ml). However, the optimal condition should be determined individually. Blocking peptide (Cat.# 3827BP-50) is available separately.

Cat. #:3827-100
Western blot analysis of Galectin-9 expression in Jurkat cell lysate (Lane 1, 2).
