

ADFP Polyclonal Antibody

CATALOG NO: 3837-30T 30 μg (Trial size)

3837-100 100 µg

HOST: Rabbit

IMMUNOGEN: Synthetic peptide corresponding to residues surrounding

amino acids 426 of human ADFP (ID# BV-947)

SPECIES REACTIVITY: Human, Mouse, Rat, Monkey

FORMULATION:

0.5 mg/ml affinity purified rabbit polyclonal antibody in phosphate-buffered saline (PBS) containing 30% glycerol, 0.5% BSA, and 0.01% thimerosal.

STORAGE CONDITIONS:

Store at -20°C. For long term storage, aliquot and freeze at -70°C. Avoid repeated freeze/defrost cycles.

BACKGROUND:

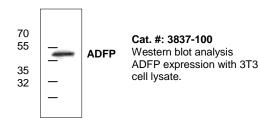

Adipocyte differentiation-related protein (ADFP) also called Adipophilin is associated with the globule surface membrane material. ADFP (Adipophilin) occurs in a wide range of cultured cell lines, including fibroblasts, endothelial and epithelial cells. ADFP may be a possible indicator for the identification of specialized differentiated cells containing lipid droplets and for diseases that link to fat-accumulating cells.

SPECIFICITY:

The antibody recognizes 48 kDa ADFP in samples from human, mouse, and rat origins. Reactivity to other species has not been tested.

APPLICATION:

The antibody can be used in Western blotting (0.5-4 µg/ml). However, the optimal concentrations should be determined individually. Blocking peptide (Cat.# 3837BP-50) is available separately.

FOR RESEARCH USE ONLY! Not to be used on humans.
