

Brk Polyclonal Antibody

CATALOG NO:	3847-30T	30 µg (Trial size)
	3847-100	100 µg
HOST:	Rabbit	
IMMUNOGEN:	Synthetic peptide corresponding to residues surrounding amino acids 508 of human Brk (ID# BV-A9)	
SPECIES REACTIVITY:	Human	

FORMULATION:

0.5 mg/ml affinity purified rabbit anti-Brk polyclonal antibody in phosphate buffered saline (PBS), pH 7.2, containing 30% glycerol, 0.5% BSA, 0.01% thimerosal.

STORAGE CONDITIONS:

Store at -20°C. For long-term storage, aliquot and freeze at -70°C. Avoid repeated freeze/defrost cycles.

DESCRIPTION:

Breast tumor kinase, Brk (also known as PTK6), is a member of intracellular tyrosine kinase family that is thought to be related to Src family of tumor related kinases. Brk is expressed in breast carcinomas but not in normal breast tissue. The presence of Brk in the nucleus appears to be linked to suppression of tumor progression and has been shown to undergo autophosphorylation.

SPECIFICITY:

The antibody recognizes ~57 kDa Brk of human, mouse, and rat origins. Reactivity to other species has not been tested.

APPLICATION AND USAGE:

The antibody can be used for Western blotting (0.5-4 µg/ml). However, the optimal conditions should be determined individually. Blocking peptide (Cat.# 3847BP-50) is available separately.

Cat. #:3847-100

Western blot analysis of Brk in lysates from Jurkat cells (Lane 1,2), 3T3 cells (Lane 3) and rat kidney (Lane 4).
