BioVision rev.03/18 For research use only

Dkk1 Polyclonal Antibody

CATALOG #: 3851-100

AMOUNT: 100 μg

LOT #: _____

Host: Rabbit

IMMUNOGEN: Synthetic peptide surrounding amino acid 255 of mouse Dkk1

(Internal ID# BV-941)

SPECIES REACTIVITY: Human, Mouse, Rat

FORMULATION:

0.5mg/ml in phosphate buffered saline (PBS), pH 7.2, containing 30% glycerol, 0.5% BSA, 5 mM EDTA and 0.03% proclin.

STORAGE CONDITIONS:

Store at -20° C. For long term storage, aliquot and freeze at -80° C. Avoid repeated freeze/thaw cycles.

BACKGROUND DESCRIPTION:

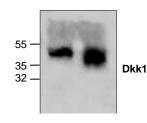

Xenopus Dickkopf (Dkk)-1 was initially discovered as a Wnt antagonist that plays an important role in head formation. By far, four members of Dkk have been identified in mammals. Each Dkk molecule contains two conserved cysteine-rich domains. Recent studies showed that the second Cys-rich domains of Dkk1 and Dkk2 inhibited Wnt-3a-activated signaling, whereas the first Cys-rich domains had no effects. In addition, the second Cys-rich domain of Dkk-2, but not that of Dkk-1, was able to activate the canonical pathway in the presence of LRP6, and this LRP-dependent signaling does not require Dvl.

SPECIFICITY:

The antibody detects ~35 kDa Dkk1 of human, mouse and rat origins.

APPLICATION AND USAGE:

The antibody can be used in Western blotting (0.5-4 μ g/ml). However, the optimal conditions should be determined individually. Blocking peptide (Cat.# 3851BP-50) is available separately.

Cat. #: 3851-100

Western blot analysi s of Dkk1 in Lysates from 3T3 cells (Lane 1) and rat kidney (Lane 2).
