

IRF3 Antibody

CATALOG #:	3877-100
AMOUNT:	100 µL
LOT #:	_____
HOST:	Rabbit
IMMUNOGEN:	Synthetic peptide of human IRF3

FORMULATION:

100 µL affinity purified rabbit polyclonal antibody in phosphate-buffered saline (PBS) containing 30% glycerol, 1% BSA and 0.02% thimerosal.

SPECIES REACTIVITY: Human

STORAGE CONDITIONS:

Store at -20°C. For long term storage, aliquot and freeze at -70°C. Avoid repeated freeze/defrost cycles.

BACKGROUND:

IRF3 is interferon regulatory factor 3, a member of the interferon regulatory transcription factor (IRF) family. IRF3 is found in an inactive cytoplasmic form that upon serine/threonine phosphorylation forms a complex with CREBBP. This complex translocates to the nucleus and activates the transcription of interferons alpha and beta, as well as other interferon-induced genes. IRF3 encodes interferon regulatory factor 3, a member of the interferon regulatory transcription factor (IRF) family. IRF3 is found in an inactive cytoplasmic form that upon serine/threonine phosphorylation forms a complex with CREBBP. This complex translocates to the nucleus and activates the transcription of interferons alpha and beta, as well as other interferon-induced genes.

SPECIFICITY:

The antibody recognizes a single 55 kDa band from samples of human origins. Reactivity to other species has not been tested.

APPLICATION:

The antibody can be used in Western blotting (1:200 – 1:500). However, the optimal concentrations should be determined individually. Transfected HEK293T cell lysate can be used as a positive control.

FOR RESEARCH USE ONLY! Not to be used on humans.
