

## APG16 Antibody

<b>CATALOG NO:</b>	3916-30T	30 µg (Trial size)
	3916-100	100 µg
<b>HOST:</b>	Rabbit	
<b>IMMUNOGEN:</b>	Synthetic peptide surrounding amino acid 565 of human APG16 (Internal ID# BV-A51).	
<b>SPECIES REACTIVITY:</b>	Human, Mouse, Rat	
<b>FORMULATION:</b>	0.5 mg/ml affinity purified rabbit anti-APG16 in PBS containing 30% glycerol, 0.5 mg/ml BSA and 0.01% thimerosal.	
<b>STORAGE CONDITIONS:</b>	Store at -20°C. For long term storage, store at -70°C.	

### DESCRIPTION:

Autophagy, the process of bulk degradation of cellular proteins through an autophagosomal-lysosomal pathway is important for normal growth control and may be defective in tumor cells. It is involved in the preservation of cellular nutrients under starvation conditions as well as the normal turnover of cytosolic components. This process is negatively regulated by TOR (Target of rapamycin) through phosphorylation of autophagy protein APG1. ATG16, another member of the autophagy protein family, forms a complex with the ATG5-ATG12 conjugate. This multimeric protein has been shown to be essential for autophagosome formation in both yeast and mammals and targets the ATG5-ATG12 complex to the autophagic isolation membrane during the formation of the autophagosome. Because mammalian ATG16 has seven WD-repeats in its C-terminal domain, it has been suggested that these may form a platform for further protein-protein interactions. Multiple isoforms of ATG16 are known to exist.

### APPLICATION AND USAGE:

The antibody can be used for Western blotting (0.5-4 µg/ml). However, the optimal conditions should be determined individually. Other applications have not been determined.

**Cat. #:3916-100**  
Western blot analysis of Apg16L1 in Jurkat cell lysates (**Lane 1&2**).
