

β- Actin Polyclonal Antibody

CATALOG NO:	3917-30T	30 µg (Trial size)
	3917-100	100 µg
HOST:	Rabbit	
IMMUNOGEN:	Synthetic peptide corresponding to residues surrounding amino acid 243 of rat β-Actin (ID# BV-A5)	
SPECIES REACTIVITY:	Human, Mouse, Rat	

FORMULATION:

0.5 mg/ml affinity purified rabbit anti-β-Actin polyclonal antibody in phosphate buffered saline (PBS), pH 7.2, containing 30% glycerol, 0.5% BSA, 0.01% thimerosal.

STORAGE CONDITIONS:

Store at -20°C. For long term storage, aliquot and freeze at -70°C. Avoid repeated freeze/defrost cycles.

BACKGROUND DESCRIPTION:

Actin is expressed in all eukaryotic cells and is the major component of the cytoskeleton. At least six types of actin are present in mammalian tissues and fall into three classes. Alpha actin expression is limited to various types of muscle and it regulates contractile potentials for the muscle cells, whereas beta and gamma actin, also known as cytoplasmic actin, are predominantly expressed in nonmuscle cells, controlling cell structure and motility.

APPLICATION AND USAGE:

The antibody can be used for Western blot analysis (0.5-4 µg/ml). It detects the 45 kDa full length and the 32 kDa cleaved fragment of beta-Actin from samples of human, mouse, and rat origins. However, the optimal conditions should be determined individually. Blocking peptide (Cat.# 3917BP-50) is available separately.

Cat. #: 3917-100

Western blot analysis of β-Actin in lysates from Jurkat cells (Lane 1&2), 3T3 cells (Lane 3) and rat kidney (Lane 4).

FOR RESEARCH USE ONLY! Not to be used on humans.
