

PAK5/PAK7 Polyclonal Antibody

CATALOG NO:	3928-30T 30 µg (Trial size) 3928-100 100 µg
HOST:	Rabbit
IMMUNOGEN:	Synthetic peptide surrounding amino acid 90 of human PAK5/PAK7 (Internal ID# BV-D53)
SPECIES:	Human, Mouse, Rat, Dog

FORMULATION:

0.5 mg/ml affinity purified rabbit anti-human PAK5/PAK7 polyclonal antibody in phosphate (PBS, pH 7.2) containing 30% glycerol, 0.5 % BSA and 0.01% thimerosal.

STORAGE CONDITIONS:

Store at -20°C. For long-term storage, aliquot and freeze at -70°C. Avoid repeated freezing/defrost cycles.

BACKGROUND DESCRIPTION:

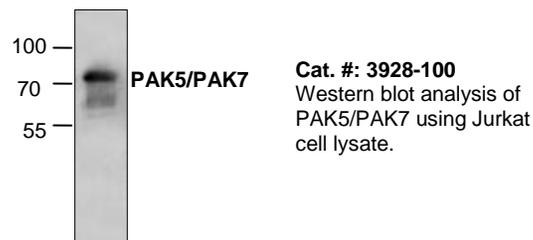

The PAK (p21-activated kinase) family of serine/threonine kinases plays an important role in multiple cellular processes, including cytoskeletal reorganization, MAPK signaling, apoptotic signaling, etc. PAK 5 is known for promoting neurite outgrowth and thus predominantly expressed in the brain. PAK 5 contains CDC42/Rac1 and has shown to bind CDC42 in the presence of GTP. PAK 5 also plays an important role in inhibiting apoptotic cascade through BAD phosphorylation.

SPECIFICITY:

The antibody recognizes ~80 kDa of Pak5/PAK7 from samples of human, mouse, rat and dog origins. Reactivity to other species has not been determined.

APPLICATION:

The antibody can be used for Western blot analysis (0.5-4 µg/ml). However, the optimal conditions should be determined individually. Blocking peptide is available separately (Cat.# 3928BP-50).

FOR RESEARCH USE ONLY! Not to be used on humans.
