# **GPR15 Polyclonal Antibody**

CATALOG #:	5215-100
AMOUNT:	100 μg
LOT#:	

## FORMULATION:

 $100~\mu g$  (0.5 mg/ml) affinity purified rabbit anti-GPR15 polyclonal antibody in phosphate buffered saline (PBS), pH 7.2, containing 50% glycerol, 1% BSA, 0.02% sodium azide.

SPECIES REACTIVITY: human, mouse, rat

### STORAGE CONDITIONS:

Store at -20°C. For long-term storage, aliquot and freeze at -70°C. Avoid repeated freeze/defrost cycles.

#### BACKGROUND:

Human immunodeficiency virus (HIV) and related virus require coreceptors to infect target cells. Some G protein-coupled receptors including CCR5, CXCR4, CCR3, CCR2b and CCR8 in the chemokine receptor family, and four new human molecules GPR15, STRL33, GPR1 and V28 were recently identified as HIV coreceptors. The gene encoding human and monkey GPR15/BOB (for G protein-coupled receptor 15 and brother of Bonzo, respectively,) were recently cloned. This novel G protein-coupled receptor serves as coreceptor for simian immunodeficiency virus (SIV), and for strains of HIV-2 and M-tropic HIV-1. The ligand for GPR15 has not been identified yet.

## **APPLICATION AND USAGE:**

The antibody can be used for Western blot analysis (1-2  $\mu$ g/ml). However, the optimal conditions should be determined individually. An approximately 50 kDa GPR15 should be detected. Human heart lysate can be used as a positive control.

For Research Use Only! Not to be used in human subjects!
