

HSP70 Polyclonal Antibody

CATALOG NO:	5859-30T 30 µg (Trial size) 5859-100 100 µg
CONCENTRATION:	0.5 mg/ml
IMMUNOGEN:	<i>E. coli</i> expressed recombinant human HSP70 (Cat. No. 4859-25)
INTERNAL ID:	BV- J57
HOST:	Rabbit
SPECIES REACTIVITY:	Human
PURIFICATION:	Affinity purified rabbit IgG
FORMULATION:	Supplied in phosphate buffered saline (PBS), pH 7.2, containing 30% glycerol, 0.5% BSA, and 0.01% thimerosal.
STORAGE CONDITIONS:	Store at -20° C. For long term storage, aliquot and freeze at -70° C. Avoid repeated freeze/thaw cycles.
DESCRIPTION:	HSP70 is a class of highly conserved stress proteins. HSP70 is comprised of multiple members, all of which bind ATP in vitro, but are localized within different intracellular compartments. These include: a) the constitutive Hsc70 (or cognate) present within the cytosol/nucleus; b) the highly stress-inducible HSP70 present within the cytosol/ nucleus/nucleolus; c) the constitutive glucose regulated 78 kDa (or BiP) protein present within the lumen of the endoplasmic reticulum; and d) the glucose regulated 75 kDa protein present within the mitochondria. HSP70 is typically not expressed in the cell under normal growth conditions, but is expressed at high levels in the cell experiencing stress. Therefore, detection of HSP70 using an antibody specific for the inducible form is quite useful in ascertaining whether a stress response has occurred in the cell.
APPLICATION:	Western blotting: 0.5-4 µg/ml Note: This information is only intended as a guide. The optimal dilutions must be determined by the user.
