DESCRIPTION:

A synthetic peptide that irreversibly inhibits activity of IETD-dependent caspases (e.g., caspase-8). The inhibitor is designed as a methyl ester to facilitate cell permeability. The product can be used for both in vitro and in vivo studies. (**CAUTION:** If the intended use is on purified or recombinant enzymes, esterase should be added to generate free carboxyl groups).

RECOMMENDED USAGE:

We recommend using 2-10 µM for inhibiting caspase activity in cell culture. The optimal doses may vary among different cells and culture conditions.

FOR RESEARCH PURPOSE ONLY! Not to be used in humans.
