DESCRIPTION: Oxytetracycline is a tetracycline analog isolated from the actinomycete *Streptomyces rimosus*. It is an antibiotic used for treatment of infections caused by Gram positive and Gram negative microorganisms such as *Mycoplasma pneumoniae*, *Pasteurella pestis*, *Escherichia coli*, *Haemophilus influenzae*, and *Diplococcus pneumoniae*. Oxytetracycline inhibits translation which results in cell death. It binds to the 30S ribosomal subunit and prevents the aminoacyl tRNA from binding to the A site of the ribosome.

HANDLING: Do not take internally. Wear gloves and mask when handling the product! Avoid contact by all modes of exposure.
