

BriteRuler™ Pre-stained Protein Ladder

CATALOG #:	9306-100
SIZE:	~100 applications (2-5 µl per lane)
VOLUME:	250 µl
FORMULATION:	0.2-0.4 mg/ml of each protein in 20 mM Tris-phosphate, pH 7.5, 2% SDS, 1 mM 2-mercaptoethanol, 3.6 M urea and 15% glycerol.
STORAGE:	Store at 25°C for 2 weeks; at 4°C for 3 months; -20°C for 24 months.
QUALITY CONTROL:	Tested in SDS-PAGE and Western Blotting

DESCRIPTION:

BioVision's BriteRuler™ Pre-stained Protein Ladder is a ready-to-use formulation which does not require boiling, contains 10 pre-stained proteins covering a wide range of molecular weights (10-180 kDa) and includes a red reference band at 75 kDa and a green reference band at 25 kDa. The protein ladder is designed for monitoring protein separation during SDS-PAGE, verification of Western blot transfer (PVDF, nylon or nitrocellulose membranes) and for the approximate sizing of proteins. Supplied as a ready-to use formulation in gel loading buffer, the ladder requires no heating, dilution or addition of reducing agents.

FEATURES & RECOMMENDED USAGE:

- Sharp and stable bands
- Two reference bands (red at 75 kDa; green at 25 kDa)
- Ready-to use (no boiling, dilution or addition of reducing agents)
- Western Blot: 2-3 µl/Lane
- SDS-PAGE:
 - 3 µl/Lane (15-Lane mini-gel)
 - 5 µl/Lane (10-Lane mini-gel)

FOR RESEARCH USE ONLY! Not to be used on humans.

Migration patterns of BriteRuler™ Pre-stained Protein Ladder

(The apparent molecular weight of each protein (kDa) has been determined by calibration against an unstained protein ladder in each electrophoresis)
