

Recombinant Mouse NGF- β

CATALOG #:	4304-5	5 μ g
	4304-20	20 μ g
	4304-100	100 μ g
	4304-1000	1 mg

LOT #: _____

SOURCE: E. coli

PURITY: >98% by SDS-PAGE and HPLC analyses
Endotoxin level is less than 0.1 ng per μ g of NGF- β

FORM: Lyophilized with no additives

RECONSTITUTION:

Centrifuge the vial prior to opening. Reconstitute in water to a concentration of 0.1-1.0 mg/ml containing 1% HSA or BSA. The solution can be diluted into other aqueous buffers and stored at 4°C for 2-7 days or store at -20°C for future use.

STORAGE CONDITIONS:

The mouse NGF- β should be stored in working aliquots at -20°C. For long-term storage, it is recommended to add a carrier protein (0.1% HAS or BSA). Avoid freeze/thaw cycles.

DESCRIPTION:

Nerve growth factor-beta (NGF- β) is a potent neurotrophic factor that supports the growth and survivability of nerve and/or glial cells. The active recombinant mouse NGF- β is a homodimer, non-glycosylated chain containing two identical 120 amino acid subunits, and having a molecular weight of 13.5 kDa.

BIOLOGICAL ACTIVITY:

This NGF- β is fully biologically active when compared to standards. The ED50 as measured by the dose-dependent induction of human TF-1 cell proliferation is typically 0.1-1 ng/ml.

RESEARCH USE: For research use only! Not to be used in humans.
