

Recombinant Human Thrombopoietin (TPO)

CATALOG #:	4351-10	10 µg
	4351-50	50 µg
	4351-1000	1 mg

LOT #: _____

SOURCE: *E. coli*

PURITY: >98% by SDS-PAGE and HPLC analyses
Endotoxin level is <0.1 ng per µg of TPO.

FORMULATION: Lyophilized with no additives

RECONSTITUTION:

Centrifuge the vial prior to opening. Reconstitution in purified water to a concentration of 0.1-1.0 mg/ml. The solution can then be diluted into other aqueous buffers and stored at 4°C for 1 week or -20°C for future use. For long term storage it is recommended to add a carrier protein (0.1% HAS or BSA).

STORAGE CONDITIONS:

The lyophilized TPO should be stored desiccated below 0°C. Reconstituted TPO should be stored in working aliquots at -20°C. For long term storage it is recommended to add a carrier protein (0.1% HAS or BSA). Avoid freeze/thaw cycles.

DESCRIPTION:

TPO (Thrombopoietin, also known as Mpl-ligand, MGDF) stimulates the proliferation and maturation of megakaryocytes and promotes increased circulating levels of platelets *in vivo*. TPO signals through the c-mpl receptor and acts as an important regulator of circulating platelets. Human and murine TPO exhibits cross-species reactivity. Recombinant human TPO is a fully biologically active 174 amino acid polypeptide, which contains the erythropoietin-like domain of the full length TPO protein.

BIOLOGICAL ACTIVITY:

The ED₅₀ as determined by the dose-dependent stimulation of the proliferation of human MO7e cells was found ≤1 ng/ml, corresponding to a specific activity of ≥1 x 10⁶ IU/mg.

FOR RESEARCH USE ONLY! Not to be used in humans.
