

Human CellExp™ CD84 / SLAMF5, human recombinant

CATALOG #: 7378-10 10 µg
7378-50 50 µg

ALTERNATE NAMES: CD84, SLAMF5, LY9B, SLAMF5, hCD84, mCD84

SOURCE: HEK 293 cells (Lys 22 – Gly 225)

PURITY: ≥ 95% by SDS-PAGE gel

MOL. WEIGHT: This protein is fused with 6×His tag at the C-terminus, has a calculated MW of 23.6 kDa. The predicted N-terminus is Lys 22. DTT-reduced Protein migrates as 35-45 kDa due to glycosylation.

ENDOTOXIN LEVEL: <1 EU/µg by LAL method

FORM: Lyophilized

FORMULATION: Lyophilized from 0.22 µm filtered solution in PBS, pH7.4. Generally 5-8% Mannitol or trehalose is added as a protectant before lyophilization.

STORAGE CONDITIONS: Store at -20°C. After reconstitution, aliquot and store at -20°C and use within 3 months. Avoid repeated freezing and thawing cycles.

RECONSTITUTION: Centrifuge the vial prior to opening. Reconstitute in sterile PBS, pH 7.4 to a concentration of 50 µg/ml. Do not vortex. This solution can be stored at 2-8°C for up to 1 month. For extended storage, it is recommended to store at -20°C.

DESCRIPTION: Leukocyte differentiation antigen CD84 is also known as SLAM family member 5 (SLAMF5), which belongs to immunoglobulin (Ig) superfamily. CD84 / SLAMF5 contain one Ig-like C2-type (immunoglobulin-like) domain. CD84 plays a role as adhesion receptor functioning by homophilic interactions and by clustering. CD84 / SLAMF5 increases proliferative responses of activated T-cells and SH2D1A/SAP does not seem to be required for this process. Homophilic interactions enhance interferon gamma/IFNG secretion in lymphocytes and induce platelet stimulation via a SH2D1A/SAP-dependent pathway.

BIOLOGICAL ACTIVITY: Measured in a cell proliferation assay using PHA stimulated human T cells in the presence of anti-CD3. The ED₅₀ for this effect is typically 2-6 µg/ml in the presence of anti-CD3 immobilized at 20 ng/ml.
