## Human CellExp<sup>™</sup> TIGIT, rabbit recombinant

| CATALOG NO:         | P1090-10   | 10 µg   |
|---------------------|--|---|
| ALTERNATE NAMES:    | TIGIT, VSIG9, VSTM3  |   |
| SOURCE:             | HEK 293 cells (Ala 17 – Pro 142)   |   |
| PURITY:             | > 95% by SDS – PAGE  |   |
| MOL. WEIGHT:        | This protein is fused with human IgG1 Fc tag at C terminus and the protein has a calculated MW of 40.4 kDa. The predicted N-terminus is Ala 17. The protein migrates as 45-50 kDa under reducing (R) condition and 90-116 kDa under non-reducing (NR) condition on SDS-PAGE gel. |   |
| ENDOTOXIN LEVEL:    | < 1.0 EU per 1µg of protein (determined by LAL method)   |   |
| FORM:               | Lyophilized  |   |
| FORMULATION:        |  | 0.22 µm filtered solution in PBS, pH 7.4.<br>I or Trehalose is added as a protectant before   |
| STORAGE CONDITIONS: | Store at -20°C. After reconstitution, aliquot and store at -80°C and use within 3 months. Avoid repeated freezing and thawing cycles.  |   |
| RECONSTITUTION:     | deionized water to<br>60 minutes at ro<br>Carrier protein (0<br>further dilution and   | vial prior to opening. Reconstitute in sterile<br>o a concentration of 50 $\mu$ g/ml. Solubilize for 30 to<br>om temperature with occasional gentle mixing.<br>.1% (W/V) HSA or BSA) is recommended for<br>d long term storage. Do not vortex. This solution<br>2-8°C for up to 1 month. For extended storage, it<br>o store at -80°C.  |
| DESCRIPTION:        | known as V-set a<br>(VSIG9), V-set ar<br>(VSTM3),which b<br>containing an imm<br>domain and an<br>(ITIM). TIGIT is e<br>regulatory CD4+ T<br>activation of these<br>affinity to the pol<br>secretion of IL1  | eptor with Ig and ITIM domains (TIGIT) is also<br>ind immunoglobulin domain-containing protein 9<br>ind transmembrane domain-containing protein 3<br>elongs to single-pass type I membrane protein<br>nunoglobulin variable domain, a transmembrane<br>immunoreceptor tyrosine-based inhibitory motif<br>gressed at low levels on peripheral memory and<br>F-cells and NK cells and is up-regulated following<br>e cells (at protein level). TIGIT binds with high<br>iovirus receptor (PVR) which causes increased<br>0 and decreased secretion of IL12B and<br>activation by promoting the generation of mature<br>dendritic cells. |

The purity of rabbit TIGIT was determined by SDS-PAGE under reducing (R) condition and staining overnight with Coomassie Blue.

## **RELATED PRODUCT:**

- Human CellExp<sup>™</sup> CCL6, mouse recombinant (Cat. No. 7226-10, -50)
- Human CellExp<sup>™</sup> CD155, human recombinant (Cat. No. 7462-10, -50)
- Human CellExp<sup>™</sup> CD160/BY55, human recombinant (Cat. No. 7386-10, -50)
- Human CellExp<sup>™</sup> CD166/ ALCAM, human recombinant (Cat. No. 7437-10, -50)
- Human CellExp<sup>™</sup> CD172A / SIRP, human recombinant (Cat. No. 7506-10, -50)
- Human CellExp<sup>™</sup> CD33 / SIGLEC-3, human recombinant (Cat. No. 7370-10, -50)
- Human CellExp<sup>™</sup> CD47, human recombinant (Cat. No. 7385-10, -50)
- Human CellExp<sup>™</sup> CD55/DAF, human recombinant (Cat. No. 7432-10, -50)
- Human CellExp<sup>™</sup> CD58 /LFA-3, human recombinant (Cat. No. 7427-10, -50)
- Human CellExp™ CD62E/E-Selectin, human recombinant (Cat. No. 7434-20, -100)
- Human CellExp<sup>™</sup> CD71 / TFRC / TFR, human recombinant (Cat. No. 7279-10, -50
- Human CellExp<sup>™</sup> CD273, human recombinant (Cat. No. 7369-10, -50)
- Human CellExp<sup>™</sup> CD36, human recombinant (Cat. No. 7371-10, -50)
- Human CellExp<sup>™</sup> CD87, human recombinant (Cat. No. 7372-20, -100)

FOR RESEARCH USE ONLY! Not to be used on humans.
