

sCD34, Human Recombinant

CATALOG NO:	P1286-5, 20	5 µg, 20 µg
ALTERNATE NAMES:	Soluble CD34, Hematopoietic progenitor cell antigen CD34	
SOURCE:	CHO cells	
PURITY:	≥ 95% by SDS-PAGE gel	
MOL. WEIGHT:	27.4 kDa	
FORM:	Lyophilized	
STORAGE CONDITIONS:	Store at -20°C. After reconstitution, aliquot and store at -20°C to -80°C. Avoid repeated freezing and thawing cycles.	
RECONSTITUTION:	DI water (~1 mg/ml)	

DESCRIPTION: CD34 is a highly glycosylated type I membrane protein that is selectively expressed on hematopoietic stem cells and vascular endothelium. It has been widely used as a molecular marker for the identification, isolation, and manipulation of hemopoietic stem cells and progenitors. CD34 can function as a regulator of hemopoietic cell adhesion by mediating the attachment of stem cells to bone marrow stromal cells or other bone marrow components. The full length human CD34 is a 385 amino acid protein, consisting of a 31 amino acid signal sequence, a 74 amino acid cytoplasmic domain, a 21 amino acid transmembrane domain and a 259 amino acid extracellular domain. Recombinant Human sCD34 is a 258 amino acid polypeptide containing only the extracellular domain of the full length CD34 protein.
