Recombinant Coronavirus Nucleoprotein (CoV-NP 229E)

Catalog No: P1506-10 10 µg  
P1506-50 50 µg

Alternate Names: Nucleoprotein, Nucleocapsid protein, NC, N

Source: E. coli

Purity: >95%

Form: Liquid

Formulation: 10 mM Phosphate Buffered Saline, pH 7.2 with 3M Urea

Storage Conditions: Store at 2-8°C for short term (≤ 1 week). For long term storage, aliquot and store at -20°C. Avoid repeated freezing and thawing.

Description: Human coronavirus 229E is a single-stranded, positive-sense, RNA virus species in the genus Alphacoronavirus of the subfamily Coronavirinae, in the family Coronaviridae, of the order Nidovirales. The coronavirus genome encodes a spike protein (S), an envelope protein, a membrane protein, and a nucleoprotein in this order. Nucleoprotein packages the positive strand viral genome RNA into a helical ribonucleocapsid (RNP) and plays a fundamental role during virion assembly through its interactions with the viral genome and membrane protein M. It also plays an important role in enhancing the efficiency of subgenomic viral RNA transcription as well as viral replication.

Amino Acid Sequence: Peptide composed of 359 amino acids containing immunodominant regions. Protein contains His tag.
